

# Pediatric Wellness Clinic

## Care for Young People of Every Age

Routine check-ups, regular vaccines, and screenings are important to help manage or prevent serious health conditions in your child at an early stage.

Our private Pediatric Wellness Clinic takes a family-centered approach to care by supporting families to be active partners in their child's growth and development. We care for you children from **birth to 18 years of age**.

### Some of our services:

- Newborn examination
- Physical examinations
- Monitoring of growth and development milestones including measurement and monitoring of weight and height
- Developmental surveillance and screening
- MOPH approved vaccinations including HPV and Meningitis B vaccine
